François Bonvalet

Dean of Toulouse Business School

Founded in 1903, Toulouse Business School is today counted amongst the most prestigious schools in France and abroad.

Its mission is to train tomorrow's managers and leaders, regardless of their background. Its strategy is focused on the value provided to students and businesses, based on strong partnerships with institutions and internationally renowned companies. With its high reputation, its commitment, and embodying its values of diversity, TBS welcomes students from around the world. Within its 5 campuses, students will find all the ingredients conducive to the development and success of their studies – a unique setting in a privileged economic and academic environment at the heart of five major international cities: Paris, Toulouse, Barcelona, Casablanca and London; a rich multicultural environment; a portfolio of Executive Education delivered in English; a research center guaranteeing quality education at the forefront of international research; globally recognized diplomas thanks to our three international accreditations: EQUIS, AMBA and AACSB, further guaranteeing our academic training excellence. Rest assured that TBS strives to meet your needs and to accompany you in the success of your career development.

Welcome to TBS!

Dr Christophe Bénaroya

Aerospace MBA Director

Developing leadership and managerial expertise in Aerospace

Operated since 1999, the Aerospace MBA is the most experienced program in that field with the largest Aerospace MBA academic backlog. This is the only general and international executive program in the world dedicated to aerospace management for business. It offers high-level international training to experienced executives and professionals who wish to develop their skills and leadership in international management applied to the aerospace sector.

Located at the core of the biggest and most dynamic Aerospace Region in Europe, the Aerospace MBA is fully involved in the aerospace landscape and has developed since its inception strategic relationships and collaborations with companies such as Airbus, ATR, Latécoère, Liebherr, Thales, Thales Alenia Space, Airbus Defense & Space, CNES-French Space Agency, Aerospace Valley. Nowhere else in the world could you find such a large number of origins and cultures and so many manufacturers, airlines, service companies, electronics businesses and research organizations, all connected in some way to the aerospace sector. That's why we attract high-caliber students from all over the world eager to join the program. Welcome aboard!

Manage and Lead in the Aerospace Value Chain

Is the Aerospace MBA the one I need?

You already work in the Aerospace Environment and you want to

- Develop your leadership skills
- Enhance your managerial competence
- Boost your internationalization
- Intensify your analytical and strategic thinking
- Step up to new challenges
- Deepen your understanding of the aerospace stakes

Or you don't but you'd love to

- Move into the aerospace sector and become part of this community
- Develop your knowledge and understanding of the aerospace environment
- Open your international horizons
- Intensify your analytical and strategic thinking
- Face new challenges

Our mission

Develop individuals with high-level executive skills for management and leadership, who will become strategy accelerators and change leaders in a customer-driven global network, all the while being responsible for transmitting high standards and values to their teams.

Our objectives

Gather individuals (delegates and contributors) from the aerospace industry and its sub-sectors (aviation, civil aircraft and engine manufacturing, defense and space) in order that they share their experience and expertise, as well as develop and deploy a global and international network of future leaders.

Your outcomes

Become responsible leaders belonging to an international network, able to lead and implement the needed changes to enable their company to cope with the current and future challenges of Aeronautical, Aviation, Space & Defense industries.

The Aerospace MBA delivers a world-class education effectively and conveniently for experienced managers looking to develop their international management competencies and leadership in aerospace.

One program, two rhythms

The hub a 18-month rhythm (Oct. N – March N+2)

The best option for participants living abroad and travelling frequently for business. A seminar is proposed in Montréal (Canada) and in Seattle (USA).

The long haul a 12-month rhythm (Oct. N – Oct. N+1)

A great option to experience the Toulouse way of life. A seminar is proposed in Casablanca, a fast-growing and modern industrial Aeronautic cluster.

 The long haul

 Leadership Soft Skills

Multicultural Team Projects

Executive projects for leading and innovative aerospace organizations aiming at finding new business models, identifying new strategies & market opportunities, anticipating business trends and changes.

Conferences & Professional Events

Attending these events as speakers, visitors, exhibitors, sharing expertise and market vision.

Case Studies & Peer Learning

Many case studies are used in the course of the modules to learn, think & create, and to constantly develop leadership skills.

> 500 hours

Another option in India in partnership with Indian Institute of Management Bangalore (IIMB) (2 years), designed for executives living and working in India while enjoying the program
